Keep It Simple

Written by the chair of the LEED-Neighborhood Development (LEED-ND)initiative, Sustainable Urbanism: Urban Design with Natureis both an urgent call to action and a comprehensive introductionto "sustainable urbanism"--the emerging and growing design reformmovement that combines the creation and enhancement of walkable and diverse places with the need to build high-performance infrastructure and buildings. Providing a historic perspective on the standards and regulations that got us to where we are today in terms of urban lifestyle and attempts at reform, Douglas Farr makes a powerful case for sustainable urbanism, showing where we went wrong, and where we need to go. He then explains how to implement sustainable urbanismthrough leadership and communication in cities, communities, and neighborhoods. Essays written by Farr and others delve into such issues as: Increasing sustainability through density. Integrating transportation and land use. Creating sustainable neighborhoods, including housing, car-free areas, locally-owned...
stores, walkable neighborhoods, and universal accessibility. The health and environmental benefits of linking humans to nature, including walk-to open spaces, neighborhood stormwater systems and waste treatment, and food production. High performance buildings and district energy systems. Enriching the argument are in-depth case studies in sustainable urbanism, from BedZED in London, England and Newington in Sydney, Australia, to New Railroad Square in Santa Rosa, California and Dongtan, Shanghai, China. An epilogue looks to the future of sustainable urbanism over the next 200 years. At once solidly researched and passionately argued, Sustainable Urbanism is the ideal guidebook for urban designers, planners, and architects who are eager to make a positive impact on our--and our descendants'--buildings, cities, and lives.

Good design is enabling, and each and every one of us is a designer. Universal Design is widely recognized an important concept that should be incorporated in all person-centred policies. Sitting at the intersection of the fields of Higher Education and Universal Design, this book presents papers delivered at the Universal Design and Higher Education in Transformation Congress (UDHEIT2018), held in Dublin, Ireland, from 30 October to 2 November 2018. This event brings together key experts from industry, education, and government and non-government organization sectors to share experiences and knowledge with all participants. The 86 papers included here are grouped under 17 headings, or themes, ranging from education and digital learning through healthcare to engagement with industry and urban design. Celebrating and integrating all that is good in design, diversity and education, this book will be a valuable resource for all those interested in the inspiring and empowering developments in both Universal Design and higher education.

A citizen's guide to America's most debated policy-in-waiting. There are few issues as consequential in the lives of Americans as health care—and few issues more politically vexing. Every single American will interact with the health care system at some point in their lives, and most people will find that interaction less than satisfactory. And yet for every dollar spent in our economy, 19 cents go to health care. What are we paying for, exactly? Health care policy is notoriously complex, but what Americans want is quite simple: good health care that's easy to use and doesn't break the bank. Polls show that as many as 70 percent of Americans want the government to provide universal health coverage to all Americans. What's less clear is how to get there. Medicare for All is the leading proposal to achieve universal health coverage in America. But what is it exactly? How would it work? More importantly, is it practical or practicable? This book goes beyond partisan talking points to offer a serious examination of how Medicare for All would transform the way we give, receive, and pay for healthcare in America.

Green. It conjures images of a meadow in spring for some, and the color of money for others. What does "green" have to do with our homes? In essence, green building—or sustainable building—means being smart about how we use energy, water, and building materials so that we can live well without needlessly damaging the environment. Creating a good green home isn't just about conservation, about using less or saving more—although that's certainly part of it. It's about creating better homes that are easier on the environment, less expensive over the long term, and more delightful to come home to. That's the message Jennifer Roberts wants to share in Good Green Homes, the ultimate new guide for people who want to live in comfortable, healthy, environmentally conscious homes. With some simple steps outlined in this book, you can save money, and do your part to help save the environment. For instance, using an energy-efficient light bulb saves you money. It also results in less demand for electricity, which in turn results in less pollution from power plants, which may help a child with asthma breathe a little easier. If you associate green-built housing with the unconventional or the quirky—tree houses, geodesic domes, dwellings constructed of tires or soda bottles—think again. Perfect for homeowners, remodelers, renters (who might be surprised by how much is within their power to change), architects, builders, and interior designers, this book lays out seven fundamental principles of green building, illustrated with more than 150 color and 20 black and white photographs of more than twenty-five homes. Jennifer Roberts launched two retail stores in San Francisco specializing in environmentally sensible consumer products, including household goods; and is a freelance writer and editor on topics that include energy-efficient building design and systems.

“Designing Inclusive Futures” reflects the need to explore, in a coherent way, the issues and practicalities that lie behind design that is intended to extend our active future lives. This encompasses design for inclusion in daily life at home but also extends to the workplace and for products within these contexts. For example, given trends in employment sector growth, skills requirements, labour supply and demographic change, there is a need to predict the critical areas where individual capabilities are mismatched with the physical, social and organisational demands of work. This mismatch, which can be addressed within the domain of inclusive design, is pervasively linked to real artefacts in workspaces and their intersection with the health factors that relate to ageing. This book is the result of the fourth CWUAAT workshop held in Cambridge, England in April 2008.

Transforming our World Through Design, Diversity and Education

'A tour de force in matters of the heart.' Claire Scobie, Kindred Spirit A life worth living is a life of love. Love is the currency that transcends all others. Love connects us most deeply to our best selves, as well as to other people. The presence or absence of love makes the greatest difference to our happiness, our health and wellbeing. Yet seeking love and sustaining it continues to disappoint many people. In this powerful and practical book, Dr Stephanie Dowrick affirms our highest ideals and intentions. Better still, she shows us how possible it is to live them out. With the compassion and psychological depth that is the hallmark of her writing, she also explores the common pitfalls to love. Then, with persuasive wisdom, she helps us to transform them. Perhaps what also makes this book exceptional is that Stephanie Dowrick shows us how to live more appreciatively across all our relationships, including with our own selves. Through her powers of storytelling, she demonstrates that anything worth discovering about love improves not one but every one of our connections. In a world where fears of not being or having enough dominate, she proves that love is ours to discover, to give and to receive. 'Deeply attentive and acutely perceptive infinitely compassionate and accepting.' Josephine Brouard, Women's Health 'Stephanie Dowrick is a godsend. Her gift is the ability to write in a manner that genuinely enriches and changes lives.' Nigel Marsh, writer and global CEO 'Her wisdom is contagious. If anyone can cause a happiness revolution, she can.' Paul Wilson, author of the Calmbooks

The Universal Heart

Providing insight into the background, theory and practical applications of Universal Design for Learning (UDL), Transforming Higher Education through Universal Design for Learning: An International Perspective examines and shares best practice in UDL implementation worldwide to provide strategies for strengthening student accessibility, engagement and learning outcomes through the development of flexible learning environments. Drawing upon insightful, research-based contributions from educators and student service specialists in Australia, Belgium, Brazil, Canada, Ireland, Israel, Norway, South Africa, Spain, the UK and all across the USA, this book: considers diversity in the form of disability, minority ethnic groups, gender identities, first generation university students and varying socio-economic backgrounds; brings together key thinkers and actors in the field of UDL and expertly maps its practices to the higher educational domain; explores the multiple means of representation, expression and engagement that combine to create a successful UDL framework. Each chapter not only provides a different perspective of how UDL has helped meet the needs of all students to ensure that education is accessible, culturally responsive and socially just, but also considers how this can then be implemented into higher education environments the world over. This book is a crucial read for those who want to make a positive difference in higher education provision and outcomes.
